Summary

B.Tech Computer Science student with hands-on experience in software engineering through full-stack development and open-source contributions. Strong foundation in Data Structures & Algorithms, Object-Oriented Programming, REST APIs, and modern web development using React.js and Node.js. Passionate about software development, building reliable applications, solving complex problems, and collaborating in agile team environments.

Education

B.Tech in Computer Science & Engineering

2023 – 2027

Sagar Institute of Research & Technology, Bhopal

CGPA: 7.82/10

Technical Skills

Languages: C++ (Primary), JavaScript, Python, SQL
Frontend: React.js, Redux Toolkit, HTML5, CSS3, Tailwind CSS
Backend: Node.js, Express.js, REST APIs, JWT Authentication
Database: MongoDB
Developer Tools: Git, GitHub, Postman, Swagger, VS Code, Render, Netlify
Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks
Concepts: Object-Oriented Programming, SDLC, RESTful API Design

Experience

Open Source Contributor | CalSci.io

Ongoing

- Contributed to a production-grade scientific calculator platform used by engineers and researchers.
- Improved UI responsiveness by developing reusable React components, enhancing maintainability and user experience. **React.js**.
- Collaborated with open-source contributors using GitHub workflows, code reviews, and pull requests to deliver production-ready features.
- Live:** [calsci.io](#) | **Code:** [GitHub](#)

Projects

Finance Data Processing & Access Control Backend | Node.js, Express.js, MongoDB

- Designed and developed secure RESTful APIs using **Node.js**, **Express.js**, and **MongoDB**.
- Implemented **JWT authentication**, **Role-Based Access Control (RBAC)**, and **Redis**-based token blacklisting for enhanced application security.
- Protected API endpoints using middleware and secured user credentials with **bcrypt** password hashing.
- Documented APIs using **Swagger**, tested endpoints with **Postman**, and deployed the backend on **Render**.
- Docs:** [Swagger](#) | **Code:** [GitHub](#)

Food Delivery Website with Realtime Map Live Tracking | MERN Stack

- Developed a full-stack food delivery platform using the **MERN** stack with responsive user interfaces and secure backend services.
- Integrated **real-time order tracking** with live map functionality to provide users with delivery status updates.
- Built RESTful APIs for user authentication, restaurant management, cart, orders, and delivery workflows.
- Implemented reusable React components and state management to deliver a smooth and interactive user experience.
- Code:** [GitHub](#)

SIH Alumni Hub | Smart India Hackathon

- Collaborated in a team to develop a centralized alumni engagement platform for improving communication and alumni data management.
- Developed responsive user interfaces for alumni profiles, registration, and engagement features using modern frontend technologies.
- Worked with Git and GitHub for collaborative development and version control during the hackathon.
- Code:** [GitHub](#)

Certifications

MERN Stack Certification | Sheryians Coding School

2026

- Completed a comprehensive certification covering the **MongoDB, Express.js, React.js, and Node.js (MERN)** stack.
- Built full-stack web applications, RESTful APIs, authentication systems, and responsive user interfaces through hands-on projects.
- **Verify:** [Credential](#)

ReactJS Certification | Infosys Springboard

2026

- Completed a certified course on **ReactJS**, covering component-based architecture, React Hooks, state management, and modern frontend development practices.
- **Verify:** [Credential](#)

Achievements

- Earned the **GitHub Pull Shark** badge for successfully contributing and merging multiple open-source pull requests.
- Solved **200+ Data Structures & Algorithms** problems by following the **Striver A2Z DSA Sheet** on the **Take U Forward** platform, strengthening problem-solving and algorithmic skills.
- Contributed to the production-grade open-source project **CalSci.io**, collaborating through GitHub workflows and pull requests.
